Gary and/or LeRoy,

I wanted to give you an update as to where I am at with things. As of right now Gary you have 3 Veolia profiles and one Ecoserv profile for FT1002 that need signed. I have a Lonestar profile completed for TT407 however due to the TPH levels that will be a Class 1 waste and I'll need a state waste code. I have applied for waste codes with TCEQ and I expect to have those numbers tomorrow. Once I receive that I'll finalize the profile and get it over to you for signature.

At some point I'd also like to get together on the TT408 and FT506 to discuss how you would like to move forward with disposal. I know we had an earlier conversation about trying to clean those samples up and alleviate some of those waste codes. Either way is fine with me we have pricing to move forward on both fronts. VB620 liquids were just approved into Lonestar, we can get those scheduled for next week I just need to know what day works best for everyone. LeRoy-we will have to hand write that manifest, it will be the same as the manifest for FT1001. Please make sure you note in Section 14 that this is VB620 so we can keep these straight.

The last item for now is the data for the non-hazardous vac boxes. I'm hoping to send that data over to Waste Connections in the next couple of days. I need to work with procurement on their contract so once that is in place we can get that information moving as well. Gary, I realize a lot of information came in this week and you need to see the bid analysis for these streams. We'll get you this information I'm just trying to get profiles moving STAT so we can ship as quickly as possible. I will be off tomorrow however if you need me please call my cell phone. I believe that is it for now, have a good weekend everyone!!

Thanks,

Beth Crawford
